

# **BONNEVILLE POWER ADMINISTRATION FISH AND WILDLIFE BUDGET TRACKING REPORT 4th QUARTER, FISCAL YEAR 2000**

**FY2000 Available Budget:       \$168,603,684**

**Amount processed to date:       68%**  
**Number of current projects:     408**

**Information  
Current Through:  
October 20, 2000**

**FISH AND WILDLIFE PROGRAM  
CATEGORIES**

## **Fish and Wildlife Program Background**

Projects funded through this program implement the *Columbia River Basin Fish and Wildlife Program* developed by the Northwest Power Planning Council (Council), the *Biological Opinion on Snake River Salmon* developed by the National Marine Fisheries Service (NMFS), the *Biological Opinion on Kootenai River Sturgeon* developed by the U.S. Fish and Wildlife Service (USFWS), and portions of *Wy-Kan-Ush-Mi Wa-Kish-Wit*, the salmon and steelhead restoration plan of the Nez Perce, Umatilla, Warm Springs and Yakama Tribes.

This report includes only direct-funded program elements -- other components of BPA's Fish and Wildlife funding include reimbursements to other agencies such as the U.S. Army Corps of Engineers, Bureau of Reclamation, and the Council; foregone revenues and costs of hydrosystem operations for fish, and interest and amortization costs of previous capital investments. These categories of program costs are detailed in a separate report.

The Council allocates direct program funding to three major program elements: Anadromous Fish, Resident Fish and Wildlife. For this report, we add a fourth category that lists Bonneville Power Administration (BPA) program and project support, contracted program coordination, placeholders for interest and reserve funds, and agency loading. Within those major groups projects are organized by geographic area, with two non-geographic categories – Mainstem Research, Monitoring and Evaluation; and Systemwide Projects and Coordination.

The direct-funded Fish and Wildlife Program Budget is subject to review by the Columbia Basin Fish and Wildlife Authority (CBFWA) and the Independent Scientific Review Panel (ISRP), and is approved by the Council.

## **About This Report**

The Bonneville Power Administration provides this financial tracking report on a quarterly basis. Our intent is to ensure that all interested parties have access to current budget tracking information.

## Columns

In this report, funding listed under the "Authorization" column represents the projected cost of work proposals approved by the Council, plus any funds carried-forward from the previous year. The "Net Transfers" summarizes any movements of funds within the budget that affect the project. The "Current Plan" column is the authorized amount plus transactions. The "In Process or Obligated" column indicates the amount contracted to date during the current fiscal year. The "Balance" column shows current plan minus all in-process or completed contract amounts.

## Categories

In addition to the broad program categories of Anadromous Fish, Resident Fish, Wildlife and Program Coordination, and the secondary geographic classifications, project types are identified and the proportion of spending on sub-categories within each geographic grouping is illustrated in the header for that group. This third category includes project types such as

habitat, passage, production, land acquisition, research and evaluation, monitoring, etc.

## Adjustment Processes

Project costs displayed in this report can differ from the costs projected by the Council for several reasons. During each year, some projects proceed faster or slower than expected. Where the delay causes the project funding not to be obligated during a given fiscal year, the amount can be carried forward with the project. Other projects are contracted at prices that are more or less than expected. In other cases, work planned for one project number is contracted under a sub-project or related project. Transactions are recorded to reflect movements of carry-forward, positive and negative changes in actual contract costs, and transfers of work between projects. The net effect of these adjustments is listed in the "Net Transfers" column of this quarterly report, and a separate detailed transaction record is also available.

If you have questions or comments about any information in this report, contact Robb Pierson at (503) 230-3118.

# Anadromous Fish

**Total 2000 Planned Investment: \$115,705,280**
